

Feelings Station

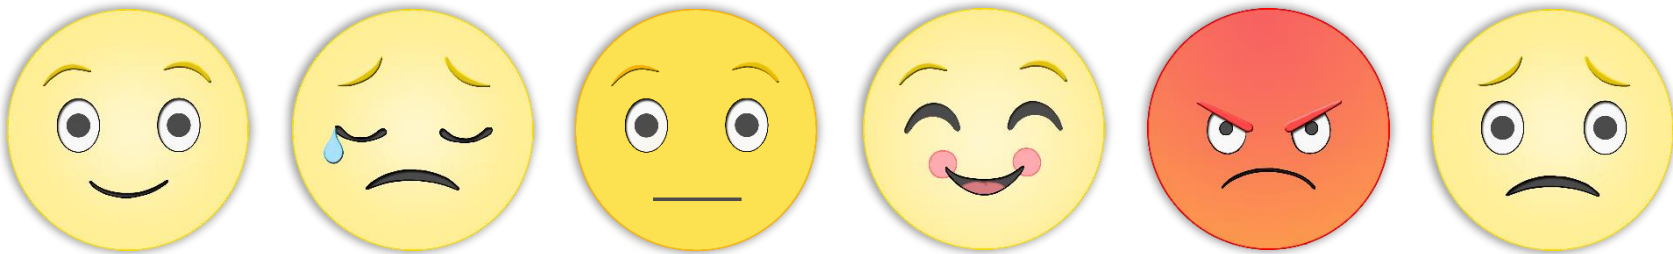

Interactive Self-Registration Display

This display is intended to be an interactive self-registration display that can evolve throughout the day. The children can find and add their names to the emoji that expresses how they are feeling at the start of the day and then they are encouraged to change the position of their name as they see fit as the day progresses.

An adult can quickly check to see how the group is feeling and follow up on anyone who may have indicated that they are sad, angry, etc.

Two sizes of emoji are included so that the display can fit different settings. Large (p4-9) and Small (p10-12).

For name tags, print p13 as many times as needed.
